The CIA: long-range planning for a drugged and debilitated society by Theodore

The CIA: long-range planning for a drugged and debilitated society

Deze info van **Jon Rappoport** doet het ergste vermoeden, namelijk, dat er sprake is van een geplande actie van heel erg superieur ultra bovenaf om de FIF academisch goedgekeurde medicijnen drugs in toenemende mate te verspreiden onder alle bevolkingen.

1964

1963

1964

Dallas, Texas
22.11.1963

There is a plot in this country to enslave every man, woman and child - moord op JF Kennedy, 1 week na deze uitspraak.

CIA directeur Allen Dulles geeft het MKULTRA programma toestemming voor produceren en testen van middelen en biologische stoffen die de CIA voornamelijk control en gedragsmanipulatie zou kunnen gebruiken.

1969

1969

Dr. Donald MacArthur, een hooggeplaatste administrateur voor biologisch onderzoek aan het departement van defensie, verschijnt op 1 juli voor de Defence Appropriations Committee van het Huis van Afgevaardigden en vraagt voor het leger om \$10 miljoen, om binnen 5 tot 10 jaar een nieuwe, infectieuze synthetische biologische agent te ontwikkelen waartegen geen natuurlijke immuunrespons bestaat.

1974

Onafhankelijk onderzoek doemt in het oog van industrie (Men noemde het Nazi- bemoeienissen, omdat men met precies hetzelfde bezig was.) DavidDeWied ontdekt en beschrijft de gevarenreflex waarmee het zenuwstelsel reageert op vreemde stoffen met een patroon dat lijkt op de patronen van neurotransmitters. Zijn onderzoek wordt tegengewerkt en stopgezet bij gebrek aan middelen.

La médecine n'a pas besoin de savants

deWied: phenylalanine in neuroleptiden veroorzaakt

deWied niet door industrie gesteund. Het onderzoek werd tot zijn spijt voortijdig gestaakt. - Dit wordt ook duidelijk in zijn helaas onvoltooide pennenvrucht: Van Toeschouwer Tot Scheidsrechter. Het bevat herinneringen aan zijn presidentschap van de KNAW van 1984-1990 en bespreekt een aantal daarmee samenhangende kwesties. De vraag is of hij het in deze vorm gepubliceerd zou willen zien. Zijn kinderen

"Long ago, I interviewed John Marks, author of Search for the Manchurian Candidate, the book that exposed the CIA's MKULTRA mind-control program. He told me that in 1962, when MKULTRA supposedly ended, the CIA actually transferred the program to its Office of Research and Development, where it went completely dark. A CIA representative told Marks there were a hundred boxes of material on the 'new' MKULTRA, and he, Marks, would never see any of it, no matter how many FOIA requests he made." (The Underground, Jon Rappoport)

"Plans for guiding the world can be formed and launched a long, long time before we see the results. Don't assume cause and effect are merely and only short-term. That's an unwarranted idea." (The Underground)

Drugs to transform individuals...and even, by implication, society.

Drug research going far beyond the usual brief descriptions of MKULTRA.

The intention is there, in the record.

A CIA document was included in the transcript of the 1977 US Senate Hearings on MKULTRA, the CIA's mind-control program.

The CIA wanted to discover drugs which would produce "paralysis of the legs, acute anemia, etc." A way to make people decline in health as if from diseases.

The CIA wanted to develop drugs that would "alter personality structure" and thus induce a person's dependence on another person. How about dependence in general? For instance, dependence on institutions, governments?

The CIA wanted to discover chemicals that would "lower the ambition and general working efficiency of men." Sounds like a general description of the devolution of society.

As you read the list yourself, you'll see more implications/possibilities.

Here, from 1955, quoted verbatim from the Agency document, are the types of drugs the MKULTRA men at the CIA were looking for:

- * Substances which will promote illogical thinking and impulsiveness to the point where the recipient would be discredited in public.
- * Substances which increase the efficiency of mentation and perception.
- * Materials which will prevent or counteract the intoxicating effect of alcohol.
- * Materials which will promote the intoxicating effect of alcohol.
- * Materials which will produce the signs and symptoms of recognized diseases in a reversible way so that they may be used for malingering, etc.
- * Materials which will render the induction of hypnosis easier or otherwise enhance its usefulness.
- * Substances which will enhance the ability of individuals to withstand privation, torture and coercion during interrogation and so-called "brain-washing".
- * Materials and physical methods which will produce amnesia for events preceding and during their use.
- * Physical methods of producing shock and confusion over extended periods of time and capable of surreptitious use.
- * Substances which produce physical disablement such as paralysis of the legs, acute anemia, etc.

A secret in-house facility.

Over the years, more facilities could be created.

If you examine the full range of psychiatric drugs developed since 1955, you'll see that a number of them fit the CIA's agenda. Speed-type chemicals, which addle the brain over the long term, to treat so-called ADHD. Anti-psychotic drugs, to render patients more and more dependent on others (and government) as they sink into profound disability and incur motor brain damage. And of course, the SSRI antidepressants, like Prozac and Paxil and Zoloft, which produce extreme and debilitating highs and lows—and also push people over the edge into committing violence.

These drugs drag the whole society down into lower and lower levels of consciousness and action.

If that's the goal of a very powerful and clandestine government agency...it's succeeding.

Wij staan erbij en kijken ernaar.

Wij, de debielen, die wel wetenschappelijk zouden zijn, maar ziekten bij handopsteking verzinnen en hardnekkig weigeren om de werking van psychotica openbaar bekend te maken.

Een wetenschap die gedijt op F* Inconvenient Facts.**

Een medisch gewaande wetenschap, waar kennis steeds nog het grootste taboe blijft. Foei!
